* Print speed indicates approximate batch print speed and is measured from the time a card feeds into the printer to the time it ejects from the printer. Print speeds do not include encoding time or the time needed for the PC to process the image. Process time is depend on the size of the file, the CPU, the amount of PC memory, the interface (SCSI, USB, Parallel), and the amount of resources at the time of the print job.

** RFID encoding capabilities differ depending on technology, please consult Team Nisca for more details.

*** 109 Cards per hour required two PR5302 laminators attached to one PR5350 Printer.
